PERSONAL PROJECTS

Fianacr (09/2019 – Present) ↗
- The project is a budget expense tracking where the user details including their expenses data and the location of the purchase. A visual representation of their expenses on a daily, weekly or monthly basis using Charts and the location of the purchase using the map is provided. The project was built on Node, Express, Express Sessions, MySql,passport.js and handlebars.js for templating.
- Ref: https://financr-6d.herokuapp.com/

Things2Do (08/2019 – 08/2019) ↗
- The project is a representation of an idea for someone to find events and places to stay while someone new to canada. It consists of the use of HTML, CSS, JS, Ajax, Bootstrap, Fetch API. We made use of TicketMaster API for Hotel listings and Zomato API for restaurant listing
